- You have or ever have had **hemorrhoids** you know it's a very unpleasant experience in order to pit it lightly.
- There are many over the counter treatments for hemorrhoids however you might be interested in order to know how to handle hemorrhoids naturally.

One of the prime reasons it's preferable to learn how to handle hemorrhoids naturally is that the majority of the non- prescription solutions simply fail. The particular cremes, pills and even suppositories are merely intended to tackle your own symptoms. This will give you some limited relief but your hemorrhoids will eventually be back with a vengeance. The bottom line is if these companies make profits off the fact that people are depend on their solutions.

- Another solution people consider when it comes to how to treat hemorrhoids is surgery or other medical solutions.
- These methods are very expensive and should only be employed when all other options are worn out.
- As with any medical procedure there is a bit of a risk factor involved.
- Honestly I Prefer to avoid surgery however either way this should only be your last resort after exhausting all other available choices.

With regard in order to discovering how to treat hemorrhoids naturally there are some things you may employ straight away which can jumpstart the recovery process. The first thing you can do is adjust your diet to include extra fiber. A lack of fiber has been observed as one of the key causes leading to hemorrhoids. When adding fiber try to accomplish this via whole foods rather than soluble fiber supplements. The body absorbs and processes whole food more efficiently and processed items should include added chemicals which might work against the whole purpose of taking in the extra fiber.

## Another Thing that can Help is Stay Away from or Cut Down Processed Foods in General

This can be hard for many folks, particularly in our bustling society. Probably the most direct way is to start slowly by adding additional whole fruits and vegetables to come with your meals. This will also help with your fiber consumption too. Once you get a routine going it is a breeze to keep making small changes and eventually you can eliminate the majority of processed foods- simply be preparing foods ahead of time for those days you know you will not have enough time.
